

For every lock, there is someone out there trying to pick it or break in.

*Don't wait to act until after you're hacked!*

# PROTECT YOUR DIGITAL LIFE

*Every one of us needs to accept the challenge that securing our online lives is a shared responsibility.*

## 3 Easy Steps You Can Take NOW To Be Safer Online

**1** **CREATE STRONG PASSWORDS**  
Longer passwords are stronger and harder to crack. Consider creating a "pass phrase" instead, which is an easy to remember sentence that uses a combination of letters, numbers and special characters. Example: LiveLife2theFulle\$t! Don't use the same password for all accounts.

**2** **USE PUBLIC Wi Fi WISELY**  
Public computers are not secure, so anyone can potentially see what you do while you're connected to the network. Limit the type of business you do and don't share sensitive information. Delete your browsing history and log out completely.

**3** **LEARN TO SPOT MALICIOUS EMAILS**  
Hackers often send authentic looking emails masquerading as a person or company you trust. Before clicking on a link, STOP and check the sender's email id to confirm it's a recognized name with no misspellings (ie, @microsoft.com NOT @microsoftt.com OR @micro.soft.com)

**Help promote a safer connected world.**

STOP | THINK | CONNECT™

Scandurra Group is proud to be an official partner of STOP. THINK. CONNECT.™, the global online safety awareness and education campaign of the National Cyber Security Alliance. We join hundreds of organizations around the world in support of a safer, more secure and more trusted internet. [scandurragroup.com/cyberaware](http://scandurragroup.com/cyberaware)
